RUBBER CHEMISTRY AND TECHNOLOGY
VOLUME 73, 2000
AUTHOR INDEX†

Abhiraman, A. S.; Sharma, V.; Desai, P.: Mechanics of fibers, yarns and cords: Links via models at the molecular level (abs-F99#117) (1) 172
Abmaur Jr., D. W. see Tse, Mun F.: (abs-F99#81) (1) 162
Abyaneh, A. Abbasi see Eftekhary, A.: (abs-F99#183) (1) 190
Agarwal, Rajat; Fristad, William: Using Autophoretic® coatings as a corrosion resistant pretreatment for bonding rubber-to-metal (abs-F99#40) (1) 149
Aik-Hwee, Eng see Kawahara, Seiichi: (1) 39
Allegra, Giuseppe; Raos, Guido: Network-driven filler agglomeration in rubbers (abs-F99#43) (1) 150
Allison, Wallace H. see Lamb, James J.: (abs-F99#147) (1) 181
Alshuth, Th.; Schuster, R. H.: Strategies of advanced dynamic testing (abs-F99#124) (1) 173
Amarasakera, Jay see Burkus II, Frank S.: (abs-F99#68) (1) 157
Amdur, Shimon: Removing natural latex proteins from dipped rubber goods with fumed silica additives (abs-F99#80) (1) 161
Antony, Prince; De, S. K.: Ionic thermoplastic elastomers (abs-F99#13) (1) 141
Arastoopour, H. see Bilgili, E.: (2) 340
Arruda, Ellen M. see Boyce, Mary C.: (3) 504
Assink, R. A. see Celina, M.: (abs-F99#66) (1) 157
Assink, R. A. see Celina, M.: (4) 678
Ayala, Jorge see Rowlinson, Mike: (abs-F99#180) (1) 189
Aziz, Abdul; Kadir, S. A.: Advances and developments in natural rubber (abs-F99#1) (1) 138

Balard, H. see Donnet, J. B.: (abs-F99#97) (1) 166
Balard, H. see Donnet, J. B.: (4) 634
Bantle, Rainer see Early, Scott: (abs-F99#127) (1) 175
Barager, Howard J.; Muschiatti, C : Vamac® ethylene acrylic elastomers for demanding automotive applications (abs-F99#189) (1) 192
Barnes, Thomas see Kolinski, Andrzej: (abs-F99#106) (1) 169
Barriquand, L. see Cochett, Ph.: (abs-F99#76) (1) 160
Barthel, H.: Silica–PDMS interactions—A New view of an old question (abs-F99#93) (1) 165
Beavers, Joe see Gonzalez, Rodney: (abs-F99#87) (1) 164
Beelen, John H. see Noordermeer, W. M.: (abs-S00#3) (4) 780
Bender, H. see Campomizzi, E. C.: (abs-F99#32) (1) 147
Berkemeier, Dieter; Maeder, Walter M.; Rinker, Maik ; Heiss, Guenther: Mixing of silica compounds from the view of a mixer supplier (abs-S00#6) (4) 781
Bernstein, B. see Bilgili, E.: (2) 340
Bertrand, P. see Johnson, M. Pontier: (abs-F99#179) (1) 189
Bertrand, P. see Johnson, M. Pontier: (5) 875
Bhowmick, A. K. see Naskar, Amit K.: (5) 902
Bhowmick, Anil K. see Kar, Kamal K.: (1) 56

* The first issue of Volume 73 contains abstracts of Fall 1999 Meeting Papers. The papers are cited in the Index as (abs-F99#...) with the appropriate paper number inserted. The fourth issue of Volume 73 has abstracts from the Spring 2000 meeting. They are cited using a similar convention, i.e., (abs-S00#...). (The Fall 2000 meeting abstracts will appear in Issue 1, 2001.) Complete copies of meeting papers may be obtained from the Rubber Division Library, The University of Akron, Akron, OH 44325-3907.

SUBJECT INDEX*

1,6-bis(*N*, *N'*-dibenzylthiocarbamoyldithio)-hexane, crosslinker for truck tire compounds (abs-F99#37) (1) 148
^{13}C-NMR spectroscopy, solid state, on accelerated sulfur vulcanized C-13 labeled EPDM (abs-S00#43) (4) 793
2,4-morpholinothio-benzothiazole sulfenamide, accelerator for sulfur vulcanization of NR (abs-F99#7) (1) 140
AC impedance spectroscopy, of carbon black–rubber composites (abs-F99#156) (1) 183
ACM (acrylate rubber), miscible blends with FKM (5) 889
AEM elastomers (ethylene acrylic), for demanding conditions in automotive use (abs-F99#189) (1) 192
AFM (atomic force microscope), as a nanoindenter for determining crosslink density and modulus of rubber (5) 912
Acrylates, multifunctional, for reducing reversion during sulfur vulcanization of diene rubbers (1) 114
Adhesion, in blends of EPDM elastomers (abs-F99#103) (1) 168
Adhesion, of BIMS to BR or IR, study of co-cure at interface (abs-F99#81) (1) 162
Adhesion, of SBR treated with sulfuric acid, to polyurethane adhesive (abs-F99#82) (1) 162
Adhesion, of novel TPVs to polyamide and polyester reinforcing materials during melt processing (abs-F99#51) (1) 152
Adhesion, of tire cords, improved by plasma polymerization of coatings on the surface (1) 121
Adhesion, of wire belts, with melamine resins requiring no cobalt or resorcinol components (abs-F99#130) (1) 176
Aging, of HNBR, as related to modulus change (abs-S00#39) (4) 791
Allergic contact dermatitis, caused by exposure to rubber chemicals (3) 427
Allergy, to natural rubber latex, manifestations (3) 427
Alpha, omega-dihydroxy terminated organosiloxanes, polycondensation using organotin catalysts (abs-F99#74) (1) 159
Analytical and rheological methods, for studying high molecular/low molecular blend of ESBR (4) 731
Anti-reversion agents, for sulfur vulcanization of diene rubbers (1) 114
Anti-tack agents, effect of conveyor on integrity of (abs-F99#15) (1) 142
AntiNOxidants, incipient surfactants which slow NO_x-driven degradation of lube oil (abs-F99#30) (1) 147
Antidegradant system for EPDM, made by constrained geometry catalyst (abs-F99#28) (1) 146
Antidegradant, for rubbers, from polymerized TMQ (abs-F99#64) (1) 156
Antioxidant, rational design through molecular modeling (abs-F99#63) (1) 156
Antioxidants and antiozonants, blends for crack resistance in tire components (abs-F99#27) (1) 146
Atomic force microscope, for characterizing elastomer cross link density and modulus on a fine scale (abs-F99#58) (1) 154
Automotive gaskets and seals, high performance, from polyacrylate rubbers (abs-F99#188) (1) 191
Autophoretic coatings, on steel to promote bonding with rubber (abs-F99#40) (1) 149

BIMS (brominated isobutylene paramethylstyrene terpolymer), blends with diene rubber, for sidewalls, ozone resistance (abs-S00#53) (4) 794
BIMS [brominated poly(isobutylene-*co*-4-methylstyrene)], adhesion to BR or IR (abs-F99#81) (1) 162
BR, blends with zinc diacrylate, fast FTIR imaging study of peroxide cure (1) 74
BR, detection of ozone by crack-induced opacity (abs-F99#62) (1) 156
BR, fracture and fatigue, factors affecting (abs-S00#55) (4) 795
Banbury mixers, oil-less dust stops (abs-F99#138) (1) 178
Bent rubber blocks, surface instabilities during compressive strain (abs-F99#47) (1) 151
Bentonite, effect of surface morphology on surface energy (abs-F99#99) (1) 167
Blends, from ethylene copolymers and specialty elastomers (abs-F99#55) (1) 153
Blends, of EPDM elastomers, improved self adhesion (abs-F99#103) (1) 168
Blends, of NR and *cis*-BR, reasons for using in tire sidewalls (abs-F99#184) (1) 191
Blends, of PP and EPDM, effect of composition and processing conditions on structure during injection molding (4) 753
Blends, of PP and EPDM, kinetic analysis of thermal degradation (4) 694
Blends, of acrylate rubber and fluorocarbon rubber (5) 889
Blends, of carboxy-terminated butadiene-*co*-acrylonitrile rubber and toughened epoxy cresol novolac (5) 830
Blends, of recycled rubbers and a range of PPs (abs-S00#61) (4) 796
Blends, of rubber and filler, retention of polymer chains (abs-F99#44) (1) 150

*Prepared by Lois W. Brock and A. B. Sullivan

Blends, of rubber, co-vulcanization using dithioates (abs-F99#22) (1) 144
Blends, of rubber, role of interphase in filler partition (abs-F99#60) (1) 154
Blends, of rubbers, carbon black-filled, tested for high frequency viscoelasticity (abs-F99#157) (1) 183
Blends, of ultrasonically devulcanized GRT with HDPE (abs-F99#107) (1) 169
Bloom, iridescence, reduction in weatherstripping (abs-F99#79) (1) 161
Bond failures, in swaged cylindrical tubeforms, solved by waterborne autodeposited flexible metal treatment (abs-F99#128) (1) 175
Bonding, of NR, effect of cure system (abs-F99#26) (1) 146
Bonding, rubber-to-metal, with autophoretic coatings (abs-F99#40) (1) 149
Bound rubber content, in silicone rubber with ultrafine mineral powder, improved test for (1) 19
Brominated isobutylene-*co*-*para*-methylstyrene, for improved tread compound for wet/winter traction (abs-S00#8) (4) 782
Bromination, of butyl rubber, in the presence of electrophylic solvents and oxidizing agents (abs-F99#159) (1) 184
Bromination, of butyl rubber, in the presence of electrophilic solvents and oxidizing agents (2) 356
Bromobutyl rubbers, with improved properties for tire inner liners (abs-F99#185) (1) 191
Buckminster-fullerene, C_{60}, in trace quantities during formation of carbon black (5) 875
Bush mountings, subjected to radial loading, stiffness (2) 253
Butadiene-*co*-acrylonitrile rubber, carboxy-terminated, in blends with ECN (5) 830
Butyl curing bladder compounds, effect of resins and aging (abs-F99#6) (1) 140
Butyl reclaim, in inner liner applications, influence of white filler (abs-S00#62) (4) 797

Butyl reclaim, in inner liners for tires (abs-F99#133) (1) 177
Butyl rubber, bromination in the presence of electrophilic solvents and oxidizing agents (2) 356
Bytewise splice width monitor, for improved efficiency (abs-F99#144) (1) 180
CO_2 solid pellets, for blasting fouling residues from rubber molds (abs-F99#176) (1) 188
CSDPF (Carbon–silica dual phase filler), for better microdispersions in rubber (4) 666
Cabot Elastomer Composite, with superior filler dispersion (abs-F99#23) (1) 144
Calendering, of cord, fundamental approach (abs-S00#27) (4) 787
Carbon black agglomerates, relation to degree of mastication (abs-F99#178) (1) 189
Carbon black filled elastomers, evaluating by neutron scattering (abs-F99#154) (1) 182
Carbon black, dual, for reinforcement of tire treads (abs-F99#145) (1) 180
Carbon black, early formation mechanisms and nucleation (5) 875
Carbon black, effect of morphological characteristics on crack growth in rubbers (abs-F99#180) (1) 189
Carbon black, electrical measurement of dispersion (abs-F99#155) (1) 182
Carbon black, flaws caused by surface humidity, method for eliminating (abs-F99#183) (1) 190
Carbon black, for peroxide-cured EPDM coolant hose (abs-F99#34) (1) 148
Carbon black, influence of basic properties on the Payne effect and reinforcing action (abs-S00#9) (4) 782
Carbon black, influence on cut growth of rubber compounds for truck tires (abs-S00#54) (4) 795
Carbon black, nucleation site for formation of primary particles (abs-F99#179) (1) 189
Carbon black, reinforcement of elastomers simulated by FEA (abs-F99#177) (1) 188
Carbon black–rubber composites, AC impedance spectroscopy (abs-F99#156) (1) 183
Carbon black-filled blends of rubbers, high frequency viscoelasticty properties (abs-F99#157) (1) 183
Carbon black-filled tire compounds, effect of recipe and mixing sequence on rheology and processability (2) 240
Carbon blacks, Raman study of graphitization (abs-F99#122) (1) 173
Carbon blacks, graphitization, studied by Raman spectra (2) 284
Carbon blacks, thermal, surface activity and chemistry (2) 293
Carbon–silica dual phase filler, with better microdispersion in rubber (abs-F99#59) (1) 154
Carbon–silica dual phase filler, distribution of silica throughout aggregates cotinuously (1) 25
Carbon–silica filler, for use in truck tire treads (abs-S00#32A) (4) 789
Chain dimensions, in polysilicate-filled PDMS (abs-F99#98) (1) 167
Characterizing rubberlike material, with fewer parameters, using strain energy function (1) 1
Charles Goodyear Medalist—2000, Jack L. Koenig (3) G49
Co-extrusion, of multicomponent profiles of EPDM and TPVs (abs-F99#52) (1) 152
Co-vulcanization, of rubber blends using dithioates (abs-F99#22) (1) 144
Coatings, water borne fluoroelastomer, for cured rubber compounds (abs-F99#18) (1) 143
Comb-shaped high molecular mass poly(oxyethylene), for polymer electrolyte (abs-F99#54) (1) 153
Compatibilization, between rubber and plastics, by use of ionomeric polyblends (abs-F99#13) (1) 141

Compounding, continuous, by use of powder rubber (abs-S00#16A) (4) 785
Compressed rubber blocks, instabilities during compressive strain (abs-F99#47) (1) 151
Compression set behavior, of addition curable silicone rubber (abs-F99#69) (1) 158
Compression stress–relaxation techniques, with oven aging, to predict lifetime of butyl seals (2) 265
Compressive strain and stress. effect on electrical condictivity of rubber composites (2) 310
Computer simulation, of crosslinking, scission and polymer modification (abs-S00#47) (4) 794
Conductive rubber composites, effect of compressive strain and stress on electrical conductivity (2) 310
Constitutive equations, for predicting stress response of sulfur vulcanized NR during simultaneous deformation and chemical aging (abs-F99#8) (1) 140
Constitutive models, of rubber elasticity (3) 504
Constrained geometry catalyst technology, for making antidegradant system for EPDM (abs-F99#28) (1) 146
Continuous mixing, of powder rubber, on twin screw extruder (abs-F99#110) (1) 170
Continuous mixing, of rubber with fillers as a powder (abs-S00#16) (4) 784
Conveyor belts, effect on integrity of anti-tack agents (abs-F99#15) (1) 142
Cord calendering, a fundamental approach (abs-S00#27) (4) 787
Crack growth rate, under mechanical fatigue, measured by deformations to a bonded rubber block (5) 818
Crack growth, in rubber disks under torsional loading (abs-F99#48) (1) 152
Crack growth, in rubbers, effect of morphological characteristics of carbon black (abs-F99#180) (1) 189
Crack interface, in unfilled and silica-filled IR. studied by FTIR (1) 47
Crack-induced opacity, in rubber for ozone detection (abs-F99#62) (1) 156
Cracking, during cure of silicone sealants (abs-F99#70) (1) 158
Crosslink density and modulus, of SBR, determined with AFM used as a nanoindenter (5) 912
Crosslink density, of differently cured and aged rubbers, studied by NMR microscopy (abs-F99#86) (1) 163
Crosslink structure analysis, for validating accumulated degradation in a NR component (abs-F99#5) (1) 139
Crosslinker, bifunctional, for diene rubber (abs-F99#37) (1) 148
Crosslinking, of EPDM with phenol–formaldehyde resin; inert species and crosslink precursors (4) 706
Crosslinking, of NR with isocyanate-based Novor® 950 (abs-F99#38) (1) 149
Crosslinks, in peroxide cured polymers containing zinc diacrylate, density and spatial distribution (abs-F99#85) (1) 163
Crystallization, of NR from different Hevea clones (1) 39
Crystallization, strain-induced, of NR detected real-time by wide-angle X-ray diffraction (abs-S00#46) (4) 793
Cure and aging, of resin vulcanized butyl curing bladders (abs-F99#6) (1) 140
Cure kinetics, for silane coupled silica-filled SBR compounds (abs-F99#146) (1) 181
Cure time, of vulcanizates, real time control using in-mold sensors (abs-S00#28) (4) 787
Curve fitting algorithms, using only a few parameters, for filled and unfilled rubberlike materials (1) 1
Cut growth, in truck tires, effect of carbon black (abs-S00#54) (4) 795
Cutaneous reactions to rubber (3) 427
Cyclic acetals, for preventing discoloring of white and colored rubber goods (abs-F99#65) (1) 157

DE304, EPDM grade for elevated temperature dynamic applications (abs-F99#12) (1) 141
Damage orientation distribution, in friction and wear of rubber (abs-S00#12) (4) 783
Damping device, model accounting for amplitude-dependent dynamic moduli of filled rubber (2) 205
Degradation, control through polymer additive during processing (abs-F99#61) (1) 154
Degradation, of rubber under ultrasonic treatment, rupture of rubber networks (2) 325
Density and spatial distribution, of crosslinks in peroxide cured polymers containing zinc diacrylate (abs-F99#85) (1) 163
Devulcanization, of crumb tire scrap, by ultrasonics (abs-F99#136) (1) 177
Devulcanization, of highly loaded scrap rubber (abs-F99#135) (1) 177
Differential dynamic modulus, as a predictor of wet skid resistance (abs-S00#58) (4) 795
Diffusion-limited oxidation, elimination of anomalies in testing of butyl seals (2) 265
Dipentamethylenee thiuram disulfide, for vulcanizing NR (1) 89
Dipped rubber goods, removing NR proteins with fumed silica (abs-F99#80) (1) 161
Dispersion aid, for silica fillers in rubber (abs-F99#36) (1) 148
Dispersion and mixing of hot carbon black, to improve rubber fatigue properties (abs-F99#183) (1) 190
Dispersion measurements, tools available and correlation with compound properties (abs-S00#31) (4) 789
Dispersion, of carbon black in polymer matrices, measured electrically (abs-F99#155) (1) 182
Dispersion, of fillers in a continuous latex system (abs-F99#23) (1) 144
Distributed monomer feed system, for synthesis of random, low vinyl SSBR (abs-F99#158) (1) 183

Dithioates, for co-vulcanization of rubber blends (abs-F99#22) (1) 144
Dobson-Gordon theory, of network statistics, for testing assumption of spatial-temporal randomness of rubber degradation (2) 325
Dust stops, oil-less, for Banbury mixers (abs-F99#138) (1) 178
Dynamic mechanical behavior, of magnetorheological elastomers (abs-F99#150) (1) 181
Dynamic testing, strategies for advanced (abs-F99#124) (1) 173
Dynamic-mechanical analysis, of filled elastomers (abs-S00#57) (4) 795

ECN (epoxy cresol novolac), blends with carboxy-terminated butadiene-*co*-acrylonitrile rubber (5) 830
EMA and EAA copolymers, blended with PDMS, ENR, EPDM, or TPU (abs-F99#55) (1) 153
EPDM coolant hose, peroxide-cured, new carbon black for (abs-F99#34) (1) 148
EPDM elastomer blends, improved self adhesion (abs-F99#103) (1) 168
EPDM rubber, filled with magnetizable powder, for primary vehicle door seals (abs-F99#17) (1) 143
EPDM rubber, irradiated by electron beam (abs-F99#83) (1) 162
EPDM rubber, labeled with carbon-13, analyzed by solid state ^{13}C-NMR spectroscopy (abs-S00#43) (4) 793
EPDM, antidegradant system by constrained geometry catalyst technology (abs-F99#28) (1) 146
EPDM, blends with PP, thermal degradation (4) 694
EPDM, co-extrusion with TPV (abs-F99#52) (1) 152
EPDM, crosslinking by phenol-formaldehyde resin, formation of inert species, crosslink precursors and crosslinks (4) 706
EPDM, derived from metalalocene catalyst technology, influence of molecular weight distribution and long chain branching on viscoelastic properties (abs-F99#100) (1) 167
EPDM, design of polymer for processability in molding applications (abs-F99#101) (1) 168
EPDM, effect of long chain branching on extrusion behavior (abs-S00#3) (4) 780
EPDM, for automotive industry, using advanced Ziegler catalysts and long chain branching technology (abs-F99#104) (1) 169
EPDM, for elevated temperature dynamic applications (abs-F99#12) (1) 141
EPDM, mechanical and elastic properties as function of third monomer (abs-F99#102) (1) 168
ESBR (emulsion SBR rubber) with two-phase high-molecular/low-molecular components (4) 731
EVM (ethylene vinyl acetate polymers), of enhanced viscosity, for extruded goods (abs-F99#187) (1) 191
Elasticity, of rubber, constitutive models (3) 504
Elastomer recycling challenges, for the automotive industry (abs-F99#169) (1) 186
Electrical conductivity, effect of compressive strain and stress in conductive rubber composites (2) 310
Electron beam radiation, of EPDM rubber (abs-F99#83) (1) 162
Electron microscopy, transmission (TEM), for observing thin films of NR crystallized under molecular orientation (5) 926
Emulsion blends, of SBR, studied by combination of analytical amd rheological methods (4) 731
Energy input, related to hysteressis loss at any extension, universal expression developed for (1) 56
Energy release rate, for a crack in a tilted rubber block (5) 818
Engage® (ethylene/octene copolymer) based on metallocene catalysts (abs-F99#100) (1) 167
Engine fluids, effects on fluoroelastomers (abs-S00#41) (4) 792
Engine mounts, of NR, protected from reversion by a two-step coating process (abs-F99#25) (1) 145
Engine mounts, of a new EPDM for elevated temperature dynamic applications (abs-F99#12) (1) 141
Environmental effects, of recycled rubber in light-fill applications (3) 551
Ethylenediamine, used in test for bound silicone rubber with ultrafine mineral powder (1) 19
Experimental Elastomer Analysis, workshop for verifying predictions with physical testing (abs-F99#45) (1) 150
Extruded goods, from enhanced viscosity EVM polymers (abs-F99#187) (1) 191
Extruder, twin screw, for continuous mixing of powder rubber (abs-F99#110) (1) 170
Extruders, for large-section profiles (abs-F99#143) (1) 180
Extruding rubber, at higher rates, using twin screw extruders (abs-F99#142) (1) 179
Extrusion behavior, of EPDM compounds, effect of long chain branching (abs-S00#3) (4) 780
Extrusion pulverization process, of rubber particles, leading to partial devulcanization (2) 340
Extrusion, of rubber at zero pressure (abs-F99#141) (1) 179
Extrusion, of rubber, numerical simulation of complex flow (abs-S00#18) (4) 785
Extrusion, of silica and carbon black compounds, modeling flow in (abs-S00#25) (4) 786
Extrusion,of tire components (abs-S00#17) (4) 785
Extrusion-rheometer, for modeling flow in extrusion of silica and carbon black compounds (abs-S00#25) (4) 786

FEA (finite element analysis), for simulation of carbon black reinforcement of elastomers (abs-F99#177) (1) 188
FKM (fluorocarbon rubber), miscible blends with ACM (5) 889
FTIR (Fourier transform infrared)study, of crack interface in unfilled and silica-filled IR (1) 47
FTIR imaging, for studying peroxide curing of BR/zinc diacrylate blends (1) 74
Farrel MVX (Mixing Vented Extruder), for compounding and shape extrusion (abs-S00#5) (4) 781
Farrel Shaw Intermix® internal mixer, operational characteristics (abs-F99#113) (1) 170
Fatigue properties, of rubber improved by using heated carbon black to eliminate its surface humidity (abs-F99#183) (1) 190
Fatty acid ester groups, linked, importance in crystallization of NR latex (1) 39
Feedstock, for thermal blacks, relation of purity to surface activity of the blacks (2) 293
Fiberoptic mid IR probe, for real-time monitoring of polymerization (abs-F99#160) (1) 184
Fibers, chopped, of para aramid, for reinforcing rubber stock (abs-F99#118) (1) 173
Fibers, yarns and cords, mechanics in composites studied by molecular level modeling (abs-F99#117) (1) 172
Filled elastomers, dynamic-mechanical analysis (abs-S00#57) (4) 795
Filled elastomers, inelastic neutron scattering for evaluating (abs-F99#154) (1) 182
Filled rubber, multiaxial cyclic response (2) 193
Filled rubber, theoretical engineering tools (abs-F99#123) (1) 173
Filled silicone rubber, new test for bound rubber content (1) 19
Filled vulcanizates, triboelastic models. dependence on rate (4) 565
Filler agglomerates, effect of network elasticity (abs-F99#43) (1) 150
Filler disperson, effect on rolling resistance of tires (abs-S00#31) (4) 789
Filler partition, role of interphase in rubber blends (abs-F99#60) (1) 154
Filler structure, studied by neutron scattering (abs-F99#151) (1) 181
Filler, carbon–silica dual phase, with better microdispersion in rubber (abs-F99#59) (1) 154
Filler, influence on high strain hysteresis loss of vulcanizates under pure shear and constrained extension (1) 56
Filler–rubber blends, retention of polymer chains (abs-F99#44) (1) 150
Filler/filler interactions, with carbon black and silica, analyzing rheological behavior of compounds (abs-S00#25) (4) 786
Filler/rubber batches, in powder form, for simplification of rubber production (abs-F99#88) (1) 164
Fillers, effect on network concentration of HNBR compounds (abs-F99#182) (1) 190
Fillers, for reinforcing rubber, importance of small size of particles (3) 524
Fillers, reinforcing, structure–processability relation of agglomerates (abs-S00#15) (4) 784
Finite element analysis, of a complex membrane, to prove relevance of rubber elasticity models (2) 366
Finite element analysis, of elastomers, workshop for more complete understanding (abs-F99#45) (1) 150
Flocculation, of carbon black aggregates during cure and relation to mastication (abs-F99#178) (1) 189
Fluoroelastomer coatings, water borne, for cured rubber compounds (abs-F99#18) (1) 143
Fluoroelastomers, and modern engine fluids (abs-S00#41) (4) 792
Fluoroelastomers, reinforced with silica fillers, physical and dynamic properties (abs-F99#78) (1) 161
Fouling residues, removed from rubber products molds in-the-press, by blasting with solid CO_2 pellets (abs-F99#176) (1) 188
Fracture and fatigue, in SBR and BR, factors affecting (abs-S00#55) (4) 795
Fracture, of elastomers, high-speed (5) 801
Friction and wear of rubber, slip direction and damage orientation distribution function (abs-S00#12) (4) 783
Frictional forces, related to hysteretic energy loss on rough rigid surfaces (4) 578
Frictional sliding, on a constrained rubber layer, model (2) 205
Fuel contact applications, use of polymers of HNBR with fluorinated thermoplastic alloy (abs-F99#9) (1) 141
Fullerene C_{60}, grafted onto polymers, to slow down NO_x-driven degradation of lube oils (abs-F99#30) (1) 147
Fullerene, C_{60}, possible nucleation site in formation of primary particles of carbon black (abs-F99#179) (1) 189

GRT (ground rubber tire), ultrasonically devulcanized and blended with HDPE (abs-F99#107) (1) 169
GTR (ground tire rubber), recycled using *trans*-polyoctenamer (abs-F99#108) (1) 170
Gloves, from NR latex with low extractable proteins (abs-F99#3) (1) 139
Goodyear Medal Address—2000 (3) 385
Graphitization, of carbon black studied by Raman spectra (abs-F99#122) (1) 173
Graphitization, of carbon blacks, studied by Raman spectra (2) 284

H_2S environments, effect on elastomers from commercial ram BOP packers (abs-S00#41A) (4) 792

HNBR compounds, influence of fillers on network concentration (abs-F99#182) (1) 190
HNBR polymer, with fluorinated thermoplastic alloy, for fuel contact applications (abs-F99#9) (1) 141
HNBR, aging behavior as related to modulus change (abs-S00#39) (4) 791
HNBR, for roll covers for severe service conditions (abs-F99#163) (1) 185
HNBR, heat resistance improved by novel heat stabilizer (abs-F99#32) (1) 147
HNBR, with improved processability and high mechanical strength and compression set resistance (abs-F99#162) (1) 185
Hardness testing, of rubber, IRHD and Shore scales (abs-F99#131) (1) 176
Heat resistance, of HNBR, improved by novel heat stabilizer (abs-F99#32) (1) 147
High frequency viscoelasticity, of carbon black-filled polymer blends (abs-F99#157) (1) 183
High-speed fracture, of elastomers, above transition where fracture surface changes (5) 801
History, or rubber research (3) 405
Hose, EPDM coolant, new carbon black for peroxide-cured (abs-F99#34) (1) 148
Hysteresis loss, high-strain, of vulcanizates under pure shear and constrained extension (1) 56
Hysteresis, in sliding resistance on a constrained rubber layer (2) 217

ICG (inverse gas chromatography), for characterization of silica aerogels surfaces (4) 634
ICG, for determining surface characteristics of carbon–silica dual phase filler (4) 666
IGC (inverse gas chromatography), for characterizing surfaces of silica xerogels (abs-F99#97) (1) 166
IIR, bromination in the presence of electrophylic solvents and oxidizing agents (abs-F99#159) (1) 184
IIR, optimization for tires (abs-F99#185) (1) 191
IR, compounded with different carbon blacks, evaluated by inelastic neutron scattering (5) 847
IR, unfilled and silica-filled, molecular structure at crack interface, studied by FTIR (1) 47
IRHD (International Rubber Hardness Degree) scale, compared with Shore scale for rubber testing (abs-F99#131) (1) 176
Impedance cure monitoring, during injection molding of rubber (abs-F99#171) (1) 187
Indian Institute of Technology, Kharagpur, role in education and research in rubber technology in India (abs-F99#132) (1) 176
Inhibitor, for mold fouling (abs-F99#39) (1) 149
Injection molding system, automated, for production of rubber medical stoppers (abs-F99#127) (1) 175
Injection molding, liquid, of silicone elastomers (abs-F99#68) (1) 157
Injection molding, of PP/EPDM blends, effect of composition and processing conditions on structure development (4) 753
Injection molding, of elastomers, process model with statistic experimental design (abs-S00#26) (4) 787
Injection molding, of rubber, analyzed with RPA (abs-F99#173) (1) 187
Injection molding, of rubber, improved productivity (abs-F99#90) (1) 164
Innerliners, for truck tires (abs-S00#56) (4) 795
Instructions to contributors (to Rubber Chemistry & Technology) (3) G40
Integration, of new technologies into testing configurations (abs-F99#126) (1) 175
Intelligent Process Control, for automatically monitoring cure time of vulcanizates (abs-S00#28) (4) 787
Intermix®, Farrel Shaw internal mixer, operational characteristics (abs-F99#113) (1) 170
International Rubber Science Hall of Fame Inductee, 1999, Robert M. Thomas (2) G27
International Rubber Science Hall of Fame, 1999, William J. Sparks (2) G29
Interphase, in rubber blends, role in filler partition (abs-F99#60) (1) 154
Ionic thermoplastic elastomers (abs-F99#13) (1) 141
Irritant contact dermatitis, caused by rubber (3) 427
Isobutylene-*co*-*para*-methylstyrene, brominated, for improved tread compound (abs-S00#8) (4) 782

Keltan®, grade of EPDM for automotive industry (abs-F99#104) (1) 169
Kieselguhr, effect of surface morphology on surface energy (abs-F99#99) (1) 167
Kinetic model, for accelerated sulfur vulcanization of NR (abs-F99#7) (1) 140
Koenig, Jack L., Charles Goodyear Medalist—2000, biog. (3) G49
Kuczkowski, Joseph A., recipient of Melvin Mooney Distinguished Technology Award, 2000 (3) G47

Laser desorption/laser photoionization mass spectroscopy, for surface analysis of rubbers (abs-F99#56) (1) 154
Latex timber clones, producing high latex yield as well as rubberwood (abs-F99#1) (1) 138
Latex, continuous process for dispersive and distributive mixing of components (abs-F99#23) (1) 144
Lube oil, slowing degradation by use of AntiNOxidants (abs-F99#30) (1) 147

MR-TC Rubber, from recycled tires, masterbatches for custom mixing (abs-F99#14) (1) 142
Magnetic coating, to improve performance of door seals (abs-F99#17) (1) 143
Magnetic resonance, for inspecting rubber (abs-F99#161) (1) 184
Magnetorheological elastomers, dynamic mechanical behavior (abs-F99#150) (1) 181
Malaysia, rubber recycling situation (abs-F99#167) (1) 186
Maleinized low molecular weight polybutadiene, for enhancing reinforcement and improve dispersion of chopped polyamide fibers in composites (abs-F99#119) (1) 173
Masterbatches, of recycled tires for custom mixing (abs-F99#14) (1) 142
Mastication, of carbon black-filled NR and effect on flocculation of black aggregates during cure (abs-F99#178) (1) 189
Materials handling, in rubber plants (abs-F99#87) (1) 164
Measuring and control, of rubber properties on-line (abs-S00#13) (4) 783
Mechanism, of action of antioxidants and antiozonants in improving crack resistance in tires (abs-F99#27) (1) 146
Medical stoppers, produced by automated injection molding of rubber (abs-F99#127) (1) 175
Melamine resins, for wire belt adhesion, requiring no cobalt or resorcinol components (abs-F99#130) (1) 176
Metal treatment and primer coating system, for use in swaged cylindrical tubeform tests (abs-F99#128) (1) 175
Metallocene ethylene elastomers, based on constrained geometry catalyst systems (abs-F99#100) (1) 167
Microscoft Visual Basic Program (SimPolyMod™), for simulation of crosslinking, scission and polymer modification (abs-S00#47) (4) 794
Microscopy and ultramicrotomy, in the rubber industry (abs-S00#44) (4) 793
Mixer, internal, Farrel Shaw Intermix®, operational characteristics of (abs-F99#113) (1) 170
Mixers, internal, intermeshing, for tires containing high silica loading (abs-S00#6) (4) 781
Mixers, internal, with 6-wing rotor (abs-S00#4) (4) 780
Mixers, with variable friction drives (abs-F99#114) (1) 170
Mixing and extrusion, using Farrel Mixing Vented Extruder (abs-S00#5) (4) 781
Mixing process, for silica "green tire" tread compound, improved with surfactant additives (abs-F99#77) (1) 160
Mixing sequence, for tire compounds, effect on rheology and processability (abs-F99#75) (1) 160
Mixing technology, various clearance, for internal batch and continuous processes (abs-F99#111) (1) 170
Mixing, dependency of tire performance on (abs-S00#14) (4) 784
Mixing, influence of raw material parameter variations (abs-S00#2) (4) 780
Mixing, of rubber with filler as a powder for a continuous system (abs-S00#16) (4) 784
Mixing, selection of downstream equipment for (abs-F99#139) (1) 178
Model, for frictional sliding on a constrained rubber layer (2) 205
Model, for new class of damping device, considering hysteresis of rubber (2) 217
Model, for predicting stress response of sulfur vulcanized NR during simultaneous deformation and chemical aging (abs-F99#8) (1) 140
Model, for rupture of rubber networks in ultrasonic degradation (abs-F99#109) (1) 170
Modeling nonlinear viscosity, in filled crosslinked rubbers (abs-F99#181) (1) 190
Modeling, of highly filled vulcanizate, dependence on rate (4) 565
Modeling, of the mixing process (abs-S00#13) (4) 783
Modelization, of filled rubbers for development of theoretical engineering tools (abs-F99#123) (1) 173
Models, for determining links between fibers, yarns and cords at the molecular level (abs-F99#117) (1) 172
Models, for rubber elasticity, comparison (Arruda–Boyce, van der Waals, Reduced Polynomial) (2) 366
Models, for stick-slip sliding (3) 486
Mold fouling inhibitor (abs-F99#39) (1) 149
Molding applications, of EPDM polymer designed with special attributes (abs-F99#101) (1) 168
Molds, for rubber products, cleaned by blasting with solid CO_2 pellets (abs-F99#176) (1) 188
Molecular modeliong, for rational design of antioxidants (abs-F99#63) (1) 156
Mooney peak, correlation between extrudate roughness in tire compounds and (2) 225
Morphological model, for reinforcing carbon black (abs-S00#15) (4) 784
Morphology and ionic conductivity, of elastomeric comb-chaped high molecular mass poly(oxyethylene) (4) 720

N-(cyclohexylthio)phthalimide, prevulcanization inhibitor of 2,2′-bisbenzothiazole-2,2′-disulfide accelerated vulcanization (abs-F99#21) (1) 144
NBR mixtures, for injection molding, understanding their behavior (abs-F99#174) (1) 188
NBR, EPDM, and blends, in conductive composites, effect of compressive strain and stress (2) 310
NC360, NR latex with low extractable proteins, for gloves (abs-F99#3) (1) 139

NMR microscopy, for spatially resolved network structure study of technical rubbers (abs-F99#86) (1) 163
NMR, solid state, and NMR imaging, for studying aspects of vulcanization (3) 385
NMR, solid state, to characterize surface activity of silica (abs-F99#121) (1) 173
NR latex, free of soluble proteins, made by radiation process (1) 80
NR proteins, removing from dipped rubber goods with fumed silica (abs-F99#80) (1) 161
NR vulcanization, with sulfur, accelerated, kinetic model for (abs-F99#7) (1) 140
NR, "green", filling silica onto by sol–gel process (abs-S00#20) (4) 786
NR, accumulated degradation validated by crosslink structure analysis (abs-F99#5) (1) 139
NR, advances and developmenets at RRIM (abs-F99#1) (1) 138
NR, batch-to-batch uniformity, through use of Rubber Process Analyzer (abs-F99#4) (1) 139
NR, crosslink reaction with dipentamethylene thiuram tetrasulfide (1) 89
NR, crystallized under molecular orientation, morphology studied by TEM (abs-F99#24) (1) 145
NR, crystallized under molecular orientation, thin films observed by TEM (5) 926
NR, from different Hevea clones, crystallization behavior (1) 39
NR, reversion resistant formulations with Novor® 950 crosslinker (abs-F99#38) (1) 149
NR, strain induced crystallization detected real-time by wide-angle X-ray diffraction (abs-S00#46) (4) 793
NR, with ground tire scrap, effect of particle size on properties (5) 902
NR/carbon black, in powder form, for simplification of production (abs-S00#16A) (4) 785
Nanoindenter, to determine cross link density and modulus of rubber, use of atomic force microscope as (abs-F99#58) (1) 154
Network concentration, in HNBR compounds, influence of fillers (abs-F99#182) (1) 190
Network structure, spatially resolved, of differently cured and aged rubbers by NMR microscopy (abs-F99#86) (1) 163
Network visualization, to estimate physical crosslink densities for a range of elastomers (abs-F99#19) (1) 143
Network-driven filler agglomeration, in rubbers (abs-F99#43) (1) 150
Neuburg Silicone Earth, filler for weatherstripping to reduce iridescence bloom (abs-F99#79) (1) 161
Neutron scattering, inelastic, from filled elastomers (abs-F99#154) (1) 182
Neutron scattering, inelastic, from filled elastomers, for evaluatting molecular dynamics (5) 847
Nicking, of silicone rubber, mechanical vs manual (abs-F99#73) (1) 159
Nordel® IP (ethylene/polypropylene/diene terpolymer), based on metallocene catalysts (abs-F99#100) (1) 167
Novor® 950, isocyanate crosslinker for NR (abs-F99#38) (1) 149
Nucleation sites, in formation of carbon blacks (abs-F99#179) (1) 189
Nucleation studies, during formation of carbon black (5) 875
Numerical simulation, of complex flow in extrusion of rubber (abs-S00#18) (4) 785
Nylon 11 (PA11), as flexible sheather for oilfield pipes (abs-S00#35) (4) 790

Oilfield plastics, lifetime prediction of PA11 and PVDF use (abs-S00#35) (4) 790
Oils, for use in tire compounding which have no carcinogenic threat (abs-F99#35) (1) 148
On-line-prediction of rubber properties (abs-S00#13) (4) 783
Optimal curing, of rubber compounds with reversion type cure behavior (1) 101
Organic coatings, aging processes with accelerated testing (abs-S00#36) (4) 791
Organic phosphites, as polymer stabilizers (abs-F99#29) (1) 146
Organosiloxanes, alpha, omega dihydroxy-terminated, polycondensation using organotin catalysts (abs-F99#74) (1) 159
Organotin catalysts, in polycondensation of alpha, omega-dihydroxy terminated organosiloxanes (abs-F99#74) (1) 159
Ozone cracking, of white and colored rubber goods, avoided with Vulkazon® AFS (abs-F99#65) (1) 157
Ozone detection, by crack-induced opacity in rubber (abs-F99#62) (1) 156
Ozone resistance, of BIMS-Diene rubber blends (abs-S00#53) (4) 794

PDMS (polydimethylsiloxane), reaction of chain segments with fumed silica (abs-F99#93) (1) 165
PDMS, chain dimension in polysilicate-filled (abs-F99#98) (1) 167
PP, blends with EPDM, thermal degradation (4) 694
PP, of varied crystallinity, prepared using zirconocene catalysts (5) 839
PP/EPDM blends, effect of composition and processing conditions during injection molding on structure development (4) 753
PPT-HDI, polar dispersion aid for silica filler in rubber (abs-F99#36) (1) 148
PTMO [poly(tetramethylene oxide)] ionenes, with Cl- PTVs, viologen elastomers, structure and properties (abs-F99#52) (1) 153

PVDF (polyvinylidene fluoride) as flexible sheather for oilfield pipes (abs-S00#35) (4) 790
Paper No. 46, Fall '99 (abs-F99#46)—full paper found here (2) 225
Para aramid chopped fibers, for reinforcing rubber stocks (abs-F99#118) (1) 173
Parylene film, for enhancing surface properties of elastomer components (abs-F99#16) (1) 142
Pavement maintenance and rehabilitation, using crumb rubber (abs-F99#170) (1) 187
Payne effect, in silica-filled rubber, proposed mechanism (abs-S00#33) (4) 789
Payne effect, influence of carbon black properties studied with RPA (abs-S00#9) (4) 782
Peroxide cured polymers, containing zinc diacrylate, crosslink density and distribution (abs-F99#85) (1) 163
Peroxide cures, of BR/diacrylate blends, studied by fast FTIR imaging (1) 74
Phase morphology, of blends of carboxy-terminated butadiene-*co*-acrylonitrile rubber with toughened epoxy cresol novolac (5) 830
Phenol–formaldehyde resin, as crosslinker for EPDM, study with low molecular-weight models (4) 706
Phenolic resin, modified, for reinforcement of elastomers (abs-F99#147) (1) 181
Physico-chemical changes, during re-activation of different types of vulcanized rubber (abs-F99#134) (1) 177
Pipe, flexible, for oilfield service, use of nylon 11 (PA11) and polyvinylidene fluoride (PVDF) as pressure sheathers (abs-S00#35) (4) 790
Policy on technical papers presented at Rubber Division meetings (3) G39
Poly(oxyethylene) comb-shaped, for polymer electrolytes (abs-F99#54) (1) 153
Poly(oxyethylene), elastomeric comb-shaped, for polymer electrolytes, effect of salt concentration on morphology (4) 720
Poly(tetramethylene oxide) ionenes with chloride anions, for viologen-type elastomer synthesis, effect of ionic content on properties (5) 864
Polyacrylate rubbers, for automotive gaskets and seals (abs-F99#188) (1) 191
Polyamide fibers, chopped, enhanced reinforcement and improved dispersion by use of maleinized low molecular weight polybutadiene (abs-F99#119) (1) 173
Polyblends, of rubber and plastics, compatibilized by ionic groups (abs-F99#13) (1) 141
Polymer additive, to control degradation during processing (abs-F99#61) (1) 154
Polymer electrolyte films, from elastomeric comb-shaped high molecular mass poly(oxyethylene) (abs-F99#54) (1) 153
Polymer electrolyte, from elastomeric comb-shaped high molecular mass poly(oxyethylene) (4) 720
Polymer life estimation, using variable temperature/stress acceleration methods (abs-S00#38) (4) 791
Polymer modification, simulated on a desktop computer (abs-S00#47) (4) 794
Polymer surfaces, studied by neotron scattering (abs-F99#151) (1) 181
Polyoctenamer, *trans*-, for recycling ground tire scrap (abs-F99#108) (1) 170
Polysilicate fillers, containing trimethyl silyl groups, chain dimensions in blends with PDMS (abs-F99#98) (1) 167
Polyurethane adhesive, relation to SBR surface-treated with sulfuric acid (abs-F99#82) (1) 162
Polyurethane propellant binders, thermal degradation (abs-F99#66) (1) 157
Polyurethane-based propellant binder, thermal degradation (4) 678
Powder form, of rubber/filler for simplified production of rubber compounds (abs-F99#88) (1) 164
Powder rubber, continuous mixing on twin screw extruder (abs-F99#110) (1) 170
Powder rubber, for simplification of production (abs-S00#16A) (4) 785
Powdered rubber, for continuous mixing (abs-S00#16) (4) 784
Predictive laboratory tests, for elastomer components, by means of crosslink structure analysis (abs-F99#5) (1) 139
Predictive models, for life of sealing systems for gas and oil (abs-S00#40) (4) 792
Process control computers, for automation of QS9000 (abs-F99#91) (1) 164
Processability, of EPDM as related to design of polymer for molding applications (abs-F99#101) (1) 168
Profiles, large-section, using high-performance degassing extruders in a continuous process (abs-F99#143) (1) 180
Propellant binder, with polyurethane, thermal degradation (4) 678
Propellant binders, polyurethane, thermal degradation (abs-F99#66) (1) 157

QS9000, automated by process control computers (abs-F99#91) (1) 164
Quality control system, QS9000, automated by process control computers (abs-F99#91) (1) 164
Quinonediimines, for stabilizing tire compounds (abs-F99#31) (1) 147

RPA 2000® rubber process analyzer, applied to injection molding (abs-F99#173) (1) 187
Radiation process, for making NR latex free of soluble protein (1) 80
Ram BOP packers, effect of H_2S environments (abs-S00#41A) (4) 792
Raman spectra, for studying graphitization of carbon blacks (2) 284

Rational chemical design, of antioxidants, through molecular modeling (abs-F99#63) (1) 156
Re-activation, of different types of vulcanized rubber (abs-F99#134) (1) 177
Real-time monitoring, of polymerization processes using mid-IR fiberoptic probe (abs-F99#160) (1) 184
Recycled rubber crumb, surface treated, for tires (abs-F99#84) (1) 163
Recycled rubbers, in blends with a range of PPs (abs-S00#61) (4) 796
Reinforced polymers, probes into structure/function relationships (abs-F99#151) (1) 181
Reinforcement mechanism, for tires with dual carbon black reinforcement (abs-F99#145) (1) 180
Reinforcement, of elastomers by carbon black simulated by FEA (abs-F99#177) (1) 188
Reinforcement, of elastomers, with modified phenolic resin (abs-F99#147) (1) 181
Reinforcement, of rubber products by chopped polyamide fibers treated with maleinized low molecular weight polybutadiene (abs-F99#119) (1) 173
Reinforcing rubber stock, with chopped para aramid fibers (abs-F99#118) (1) 173
Reinforcing, of general-purpose grade rubber, with silica generated in situ (3) 534
Residual silicone volatiles, factors affecting levels (abs-F99#74A) (1) 159
Resin vulcanized butyl curing bladder compounds, effect of aging at high temperatures (abs-F99#6) (1) 140
Retention, of polymer chains, in filler–rubber blends (abs-F99#44) (1) 150
Reversion and induction periods, in vulcanization of rubber, cure kinetic model (1) 101
Reversion, of NR engine mounts, slowed by two-step coating process (abs-F99#25) (1) 145
Rheology and processability, of silica- and carbon black-filled tire compounds, as affected by recipes and mixing sequence (2) 240
Rheology and processability, of tire compounds (2) 225
Rheology and processability, of tire compounds, effect of recipe ingredients and mixing sequence (abs-F99#75) (1) 160
Rheology, of rubber compounds (abs-S00#1) (4) 779
Rheometry, rotorless shear, for comparing thinning behavior of elastomers in shear (abs-S00#50) (4) 794
Roll covers, for severe conditions, made of HNBR (abs-F99#163) (1) 185
Rolling resistance, of tires, decreased by silane coupled silica-filled SBR compound (abs-F99#146) (1) 181
Rolling resistance, of tires, fundamentals (abs-S00#29) (4) 788
Rolling resistance, of tires, improved with highly dispersible precipitated silica (abs-F99#76) (1) 160
Rolling resistance, of tires, related to filler dispersion and network density (abs-S00#31) (4) 789
Rolls, of urethane rubber, physical properties (abs-F99#164) (1) 185

Rubber Division, ACS, The Melvin Mooney Distinguished Technology Award to Joseph A. Kuczkowski, 2000 (3) G47
Rubber Process Analyzer, for use in a tire factory to study NR variation (abs-F99#4) (1) 139
Rubber bush mounting, of reduced stiffness in tilting deflection (4) 619
Rubber crumb, from scrap tires, for manufacturing automotive and industrial parts (abs-F99#106) (1) 169
Rubber disks, crack growth studied under torsional loading (abs-F99#48) (1) 152
Rubber elasticity, comparison of models, using curve fitting algorithms (2) 366
Rubber friction, on self-affine road tracks (4) 578
Rubber mills, upgrading for improved operations and safety (abs-F99#140) (1) 179
Rubber particles, crosslink density and gel fraction measurements, to determine optimum size for particular uses (2) 340
Rubber recycling, in Malaysia (abs-F99#167) (1) 186
Rubber research, history (3) 405
Rubber technology, in India, role of Indian Institute of Technology, Kharagpur (abs-F99#132) (1) 176
Rubber, in roads, use of crumb rubber for pavement maintenance (abs-F99#170) (1) 187
Rubber–steel interface, studied by TOF-SIMS (abs-F99#57) (1) 154
Rupture, of rubber networks caused by ultrasonic treatment, model for study (2) 325
Rupture, of rubber networks, during ultrasonic degradation (abs-F99#109) (1) 170

SBR compounds, silane coupled silica-filled, cure kinetics (abs-F99#146) (1) 181
SBR copolymers, star-shaped, relation between structure and properties (abs-S00#19) (4) 785
SBR, analysis of styrene content using TGA (abs-S00#42) (4) 792
SBR, emulsion, chemically modified, in silica formulations for tires (abs-S00#30) (4) 788
SBR, fracture and fatigue, factors affecting (abs-S00#55) (4) 795
SBR, modulus and crosslink density determined using an AFM as nanoindenter (5) 912
SSBR (solution styrene–butadiene rubber), of low vinyl content, made in continuous stirred tank reactors (abs-F99#158) (1) 183
Scrap rubber, highly loaded, rejuvenation (abs-F99#135) (1) 177
Scrap tire use, as light-fill, environmental impact (3) 551
Scratch tests, for evaluating silicone duplex coatings (4) 607
Seal failure, a comparison of pragmatic and predictive approaches (abs-S00#37) (4) 791
Sealants, silicone, cracking during cure (abs-F99#70) (1) 158
Sealing performance, of primary vehicle door seals, improved by magnetic coating (abs-F99#17) (1) 143
Seals and other polymer components, review of methods for estimating aging and life (abs-S00#38) (4) 791
Seals, high performance, from polyacrylate rubbers (abs-F99#188) (1) 191
Seals, in air environments, methods for predicting lifetimes (2) 265
Service life predictions, for protective coatings (abs-S00#36) (4) 791
Service life, of elastomeric engineering components, long term predictions (abs-S00#40) (4) 792
Shear and extension, in filled rubbers (2) 193
Shear thinning behavior, of elastomers, comparing by use of capillary and rotorless shear rheometry (abs-S00#50) (4) 794
Shore scale, compared with IRHD for hardness testing of rubber (abs-F99#131) (1) 176
Silane coupling agents, as they affect in situ generation of silica for reinforcing rubbers (3) 534
Silane modified silica-filled SBR, cure kinetics (abs-F99#146) (1) 181
Silica "green tire" tread, improved mixing process using surfactant additive (abs-F99#77) (1) 160
Silica domain sizes, in carbon black–silica dual phase filler; comparable to carbon crystallites (1) 25
Silica fillers, for rubber, dispersion aid (abs-F99#36) (1) 148
Silica formulations, in E-SBR for tires (abs-S00#30) (4) 788
Silica loaded tread material, processing with internal, intermeshing mixer (abs-S00#6) (4) 781
Silica tread composition, correlated to degree of mixing (abs-S00#14) (4) 784
Silica xerogels surface characterization by IGC at zero coverage and finite concentration (abs-F99#97) (1) 166
Silica xerogels, silylated, as reinforcing fillers for silicone elastomers (4) 647
Silica xerogels, silylated, surface properties determined by ICG (4) 634
Silica, characterizing surface activity with solid state NMR (abs-F99#121) (1) 173
Silica, colloidal silylated, for reinforcing silicone elastomers (abs-F99#96) (1) 166
Silica, examining aggregate structure by CSA (abs-F99#94) (1) 165
Silica, filling onto "green" NR in situ by the sol–gel process (abs-S00#20) (4) 786
Silica, fumed, for removing NR proteins from dipped rubber goods (abs-F99#80) (1) 161
Silica, generated in situ, for reinforcing general-purpose grade rubbers (3) 534
Silica, highly dispersible precipitated, for tire compounds (abs-F99#76) (1) 160
Silica, precipitated, for heat-cured silicone rubber (abs-F99#95) (1) 165
Silica–PDMS interactions (abs-F99#93) (1) 165
Silica-filled and carbon black-filled treads, prediction of wet skid resistance (abs-S00#58) (4) 795
Silica-filled fluoroelastomers, physical and dynamic properties (abs-F99#78) (1) 161
Silica-filled rubber, influence of morphology and coupling agent on dynamic mechanical properties (abs-S00#33) (4) 789
Silica-filled tire compounds, effect of recipe and mixing sequence on rheology and processability (2) 240
Silica–silane system, compared with carbon black for understanding dynamic behavior of filled rubber (abs-S00#9) (4) 782
Silica/silane filler, added to tread composition in situ, using TESPT or disulfane silane (abs-S00#34) (4) 790
Silicas, high density, for improving tire properties (abs-S00#32) (4) 789
Silicone duplex coatings, evaluating with scratch tester (4) 607
Silicone elastomer technology, new trends (abs-F99#68) (1) 157
Silicone elastomers, factors affecting silicone volatile levels (abs-F99#74A) (1) 159
Silicone elastomers, reinforced with interpenetrating networks of silica–silicone (4) 647
Silicone elastomers, scaling fumed silica reinforcement in (abs-F99#94) (1) 165
Silicone elastomers, swelling and bleeding (abs-F99#71) (1) 158
Silicone foam, room temperature vulcanized, analytical tools used to study (abs-F99#72) (1) 159

Silicone heat-cured rubber, precipitated silica grade for (abs-F99#95) (1) 165
Silicone relastomers, reinforced with silylated colloidal silica (abs-F99#96) (1) 166
Silicone rubber, addition curable, compression set behavior (abs-F99#69) (1) 158
Silicone rubber, nicking, mechanical vs manual (abs-F99#73) (1) 159
Silicone rubber, with modified ultrafine mineral powder, study of bound rubber content (1) 19
Skid resistance, of treads containing carbon black vs silica (abs-S00#58) (4) 795
Sliding resistance, on a constrained rubber layer due to rubber hysteresis (2) 217
Slip direction, effect of dynamically changing on friction and wear of rubber (abs-S00#12) (4) 783
Solid state shear extrusion, for pulverizing rubber particles to attain greater surface area (2) 340
Sound velocity and attenuation, in rubber vulcanizates, by ultrasonic technique (abs-F99#152) (1) 182
Sparks, William J., International Rubber Science Hall of Fame, 1999 (2) G29
Spectroscopic characterization, of the molecular structure of elastomeric networks (3) 385
Splice width monitor, to improve efficiency in material preparation (abs-F99#144) (1) 180
Stabilization, by controlling degradation during processing with polymer additive (abs-F99#61) (1) 154
Stabilizers, for polymers, organic phosphites as (abs-F99#29) (1) 146
Star-shaped SBR copolymers, relation between structure and properties (abs-S00#19) (4) 785
Stearic acid and stearates, effects on NBR mixtures studied (abs-F99#174) (1) 188
Stick-slip sliding friction of elastomers (3) 486
Stiffness, of rubber bush mountings subjected to radial loading (2) 253
Stiffness, of rubber bush mountings, during tilting deflection (4) 619
Strain energy function, for filled and unfilled rubberlike material (1) 1
Strain energy release rates, for elastomers in high-speed fracture tests (5) 801
Stress response, of sulfur vulcanized NR during simultaneous deformation and chemical aging (abs-F99#8) (1) 140
Structual parameters, of filled elastomers, correlated with technological properties (abs-S00#57) (4) 795
Structure function relationships, of reinforced polymers, studied by neutron scattering and reflectometry (abs-F99#151) (1) 181
Structure–processability relation, of reinforcing filler agglomerates (abs-S00#15) (4) 784
Sulfur level, in NR, effect on bonding (abs-F99#26) (1) 146
Surface activity and chemistry, of thermal carbon blacks (2) 293
Surface analysis, of rubbers and plastics, by laser desorption/laser positionization mass spectrometry (abs-F99#56) (1) 154
Surface and fiber–rubber interface analysis, by TOF-SIMS (abs-F99#57) (1) 154
Surface characterization, of SBR trated with sulfuric acid and relation to adhesion with polyurethane adhesive (abs-F99#82) (1) 162
Surface enhancement, of elastomers using a polymer film (abs-F99#16) (1) 142
Surface instabilities, in compressed or bent rubber blocks (abs-F99#47) (1) 151
Surface modification, of EPDM rubber, by electron beam radiation (abs-F99#83) (1) 162
Surface morphology, effect on surface energy of natural fillers: kieselguhr and bentonite (abs-F99#99) (1) 167
Surface properties, of silylated silica xerogels, determined by ICG (4) 634
Swaged cylindrical tubeforms, solving bond failure in testing by use of metal treatment and primer coating (abs-F99#128) (1) 175
Swelling and bleeding, of silicone elastomers (abs-F99#71) (1) 158
Symar™-D, re-vulcanizable tire rubber crumb (abs-F99#134) (1) 177

TEM (transmission electron microscopy), for studying thin films of NR crystallized under molecular orientation (abs-F99#24) (1) 145
TEM (transmission electron microscopy), for observing thin films of NR crystallized under molecular orientation (5) 926
TGA (thermogravimetric analysis), for determining styrene content of SBR rubber (abs-S00#42) (4) 792
TMQ (2,2,4-trimethyl-1,2-dihydroquinoline), polymerized, antidegradant for rubbers (abs-F99#64) (1) 156
TOF-SIMS (time-of-flight secondary-ion mass spectrometry) for fiber–rubber interface analysis (abs-F99#57) (1) 154
TPV (Thermoplastic vulcanizates), with excellent adhesion to textile fibers during melt processing (abs-F99#51) (1) 152
TPV, co-extrusion with EPDM (abs-F99#52) (1) 152
Tear Die B Test, review of mechanical vs manual nicking of silicone rubber (abs-F99#73) (1) 159
Temperature/stress acceleration methods, for estimating life of polymer components (abs-S00#38) (4) 791
Testing configuration concepts, using new equipment, computers and networking (abs-F99#126) (1) 175
Tetraethoxysilane, sol–gel reaction on "green" NR to produce fine, well-dispersed silica (abs-S00#20) (4) 786
Textile constructions, optimization for reinforcement of passenger and van tires (abs-F99#116) (1) 172

The Melvin Mooney Technology Award, 2000, to Joseph A. Kuczkowski (3) G47
Thermal degradation, of PP–EPDM blends (4) 694
Thermal degradation, of polyurethane propellant binders (abs-F99#66) (1) 157
Thermal degradation, of propellant binder containing polyurethane (4) 678
Thermoplastic elastomers and rubber-toughened plastics, from recycled rubbers in blends (abs-S00#61) (4) 796
Thin films, of NR crystallized under molecular orientation, observed by TEM (5) 926
Thomas, Robert M., International Rubber Science Hall of Fame, 1999 (2) G27
Tilting stiffness, of rubber block bonded between two plates, energy release rate at a crack (5) 818
Tire components, extrusion (abs-S00#17) (4) 785
Tire components, numerical simulation of complex flow during extrusion (abs-S00#18) (4) 785
Tire components, ozone crack resistance improved by blend of antioxidants and antiozonants (abs-F99#27) (1) 146
Tire compounds, effect of ingredients and mixing sequence on rheology and processability (abs-F99#75) (1) 160
Tire compounds, parameters affecting rheology and processability (2) 225
Tire compounds, silica- and carbon black-filled, effect of recipes and mixing sequence on rheology and processability (2) 240
Tire compounds, stabilization with quinonediimines (abs-F99#31) (1) 147
Tire compounds, using highly dispersible precipitated silica (abs-F99#76) (1) 160
Tire cords, surface modification by plasma polymerization to improve adhesion (1) 121
Tire inner liners, from butyl reclaim (abs-F99#133) (1) 177
Tire performance, as related to the reinforcement action of active fillers (abs-S00#9) (4) 782
Tire performance, dependance on degree of mixing (abs-S00#14) (4) 784
Tire recycling, in Canada—1999 (abs-F99#166) (1) 186
Tire scrap, crumb form, as base compound for rubber parts manufacture (abs-F99#106) (1) 169
Tire scrap, ground, effect of size of particles on NR compounds (5) 902
Tire scrap, masterbatches for custom mixing (abs-F99#14) (1) 142
Tire scrap, overview of management and markets in the U.S. (abs-F99#165) (1) 186
Tire scrap, recycled, environmental effects in light-fill applications (3) 551
Tire scrap, recycling with *trans*-polyoctenamer (abs-F99#108) (1) 170
Tire scrap, reusing (abs-F99#137) (1) 178
Tire sidewalls, blends of NR and *cis*-BR, reason for using in (abs-F99#184) (1) 191
Tire sidewalls, with non-cracking blends of BIMS-diene rubber (abs-S00#53) (4) 794
Tire testing, under constant frictional force, using "FKK" Wear Tester (abs-S00#11) (4) 783
Tire traction, related to dissipated energy of rubber during sliding fraction (4) 578
Tire tread, reinforced by dual carbon black particles (abs-F99#145) (1) 180
Tire tread, silica, mixing improved with surfactant additive (abs-F99#77) (1) 160
Tire treads, incorporating tire scrap devulcanized ultrasonically (abs-F99#136) (1) 177
Tires, aircraft, wear during braking via dynamometer testing (abs-S00#10) (4) 782
Tires, from E-SBR in silica formulations (abs-S00#30) (4) 788
Tires, from surface treated recycled crumb rubber (abs-F99#84) (1) 163
Tires, improved with high density silica (abs-S00#32) (4) 789
Tires, optimization of IIR for (abs-F99#185) (1) 191
Tires, passenger and van, optimization of textile constructions for advanced reinforcement (abs-F99#116) (1) 172
Tires, use of oils other than potemntially carcinogenic aromatic (abs-F99#35) (1) 148
Titanate and zirconate coupling agents, for polymers, review of patents and papers (abs-F99#42) (1) 150
Traction, predicting for rubber compounds through high-frequency viscoelasticity and tribology (abs-S00#7) (4) 781
Tread compositions, with silica/silane filler added in situ, processing (abs-S00#34) (4) 790
Tread material, with high silica loading, processed with intermeshing internal mixers (abs-S00#6) (4) 781
Tread, for wet/winter traction, using brominated isobutylene-*co*-*para*-methylstyrene (abs-S00#8) (4) 782
Truck tire compounds, crosslinked with 1,6- bis(*N*, *N'*-dibenzylthiocarbamoyldithio)hexane (abs-F99#37) (1) 148
Truck tire treads, with carbon–silica dual phase filler (abs-S00#32A) (4) 789
Truck tires, evaluating effect of carbon black on cut growth in (abs-S00#54) (4) 795
Twin screw extruders, for continuous elastomer processing (abs-F99#142) (1) 179

Ultramicrotony, for obtaining thin specimens of rubber/black matrix (abs-S00#44) (4) 793
Ultrasonic degradation, of rubber. model for rupture of networks (abs-F99#109) (1) 170
Ultrasonic method, for devulcanization of tire scrap (abs-F99#136) (1) 177

Ultrasonic technique, for characterizing rubber vulcanizates (abs-F99#152) (1) 182
Ultrasonic treatment of rubber, model for degradation caused by (2) 325
Urethane rubbers, for rolls (abs-F99#164) (1) 185

VCMT (Various clearance mixing technology), for batch and continuous mixers and twin screw extruders (abs-F99#111) (1) 170
Vamac® ethylene acrylic elastomers, for automotive applications (abs-F99#189) (1) 192
Variable friction drives, for mixers and roll mills (abs-F99#114) (1) 170
Various clearance mixing technology, for rubber, using 6-wing rotor (abs-S00#4) (4) 780
Vehicle recycling partnership (Ford, General Motors, Chrysler), challenge to recycle automotive parts including rubber (abs-F99#169) (1) 186
Viologen elastomers, based on poly(tetramethylene oxide) ionenes with chloride ions, effect of ionic content on properties (5) 864
Viologen-type PTMO ionenes with Cl- (PTVs), effect of ionic content on structure and properties (abs-F99#52) (1) 153
Viscoelastic properties, of elastomers, correlating with fracture mechanics in high-speed testing (5) 801
Viscoelasticity, high-frequency, of tire tread compounds, and tribology for predicting traction (abs-S00#7) (4) 781
Viscosity, nonlinear, modeling in crosslinked rubbers (abs-F99#181) (1) 190
Vulcanizate structures, understanding through solid-state NMR (3) 385
Vulcanization of rubber, with sulfur, accelerated by MBTS, prevulcanization inhibitor for (abs-F99#21) (1) 144
Vulcanization, real-time impedance measurements for monitoring (abs-F99#171) (1) 187
Vulkazon® AFS, cyclic acetal for preventing discoloration of white and colored rubber goods (abs-F99#65) (1) 157

Water borne fluoroelastomer coating, for cured rubber compounds (abs-F99#18) (1) 143
Wear tester, for tires, under constant frictional force (abs-S00#11) (4) 783
Wear, of aircraft tires, during braking (abs-S00#10) (4) 782
Weatherstripping, reduction of iridescence bloom (abs-F99#79) (1) 161
Wet and dry sliding,of elastomers (3) 486
White filler (china clay), in formulations of reclaimed butyl for inner liners (abs-S00#62) (4) 797
Wire belt adhesion, improving with modified melamine resins requiring no cobalt or resorcinol components (abs-F99#130) (1) 176

Zero pressure extrusion, of rubber (abs-F99#141) (1) 179
Zirconocene catalyst, dual-side, for preparation of thermoplastic elastic polypropenes (5) 839
